CARRIER OBJECTIVE

To utilize my capabilities for understanding, optimizing, and implementing a technology in the best possible way, to deliver it as a solution.

PROJECTS

Volunteer Management System/American Muslim Senior Society. *August 2020 - Nov 2020*
The project aims for better monitoring and managing social workers in the organization. Get detailed stats about each activity achieved.

- Implemented UI of the website.
- Database design and implementation using MongoDB.
- Developing Restful API with Nodejs and Expressjs.

Vexxa - The Prescriptionist/ Campus Hackathon KJSIEIT. *February 2020 - March 2020*
A Voice Prescription app that converts the doctor's oral prescription to digital prescription and further, after a digital signature by the doctor the prescription is mailed or an SMS is sent to the patient's device.

- Implemented voice interpretation using Google NLP.
- Integration of Flask for Data Segmentation.
- Developed Front-End using Vanilla JS.

Nareshwadi HealthCard Portal/ Nareshwadi Center, Dahanu. *March 2020 - May 2020*
Managing health cards of all the children was difficult for the faculties of Nareshwadi Learning Center. So A offline based healthcare monitoring system was deployed to track student's health details.

- Learning and Implementing React js.
- Deploying the website using Github-pages.

COVID Tracker For Vasai-Virar Region/ Personal Project. *April 2020 - Present*
Due to the ongoing crisis of COVID 19, A lot of data that is not true is passed through social media platforms. So in order to provide correct data and give a better understanding of the situation <http://vvinfo.xyz> portal was created for the people of Vasai-Virar.

- Learning and Implementing React js.
- Deploying the website using Github-pages.
